

## Word Power

When I started the work on word power with students I thought I will kindle thinking.

But students have shown interest, liking for the activity. I noticed hilarity (आनंद) in them. They admitted that fidgety is now subdued. I was in stupefaction (आश्चर्य, अचंबा) when I found that values /morals are instilled in them. I was astonished to find that students admit that there are so many negativities in them. I thought they will go berserk (रागाने बेभान होणे) instead. But their candid acceptance accelerated the activity, and I was jovial that I found the master key to bring them back to work, infuse qualities & adore their personalities with virtues . I hope, soon the existing label of nasty- to Std. X will be changed to gaiety.

I am cogitating how could it all happen? Still vivid answer I did not get. Pursuit for the answer is still on. I am sure as the activity will gain the momentum, I may get enlightened and many more reasons will be revealed. Till then I have decided to make merry.
